Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on RCE December 9, 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.

DETAILED ACTION

Request for Continued Examination

This communication is responsive to Applicant's Request for Continued Examination of December 9, 2003. Applicant has added new claims 24-32. Currently claims 1-32 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 11, 12, and 16-28, drawn to methods of manufacturing a liquid crystal display, classified in class 349, subclasses 153 and 190.
- II. Claims 8-10, 13-15, and 29-32, drawn to a buffer plate for applying pressure to a display panel body, tentatively classified in class 73, subclass 715.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case (2), the apparatus (Applicant's buffer plate) can be used to practice another and materially different process. The buffer plate can be used in the process for applying pressure to a display panel such as an electro-chromic display panel and not necessarily a liquid crystal display panel.

Art Unit: 2871

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Invention I:

Species A, Claims 1-7, 11, 12, and 24-28, drawn to a method of manufacturing a liquid crystal display panel in which a thermally conductive buffer plate comprising a heat shrinkable material which is pre-heated at one or more outer surfaces of a pair of substrates of a display panel body and aligned such that an opening that is formed in the buffer plate overlaps the display area of the display panel body.

Species B, claims 16-23, drawn to a method of manufacturing a liquid crystal display panel and in which the buffer plate comprises a rigid film having a high rigidity and buffer films provided to sandwich the rigid film and having a lower rigidity than the rigid film.

Applicant is required under 35 U.S.C. 121 to elect Invention I (species A or B) or Invention II for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 may be generic to species A and claim 16 may be generic to species B.

Art Unit: 2871

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
